

PLASTIC WELDING EQUIPMENT

SCR/63

MECHANICAL SCRAPER FOR PE, PE-X, PP AND PP-R PIPES

Capacity from Ø 20 mm to Ø 63 mm

This mechanical scraper is used to take away the external superficial coat of pipes and fittings for electrofusion welding.

Also adapters, which are useful to scrape diameters from Ø 20 mm to Ø 63 mm with all thickness, are supplied together with the scraper.

The mounted special blade offers the availability of two sharp to the end user: if necessary it is just needed to unscrew the blade, turn it and place it again in order to continue the job.

The SCR/63 scraper is supplied in a thermoplastic box together. Also the accessories and the blade key are inside this box.

As optional a kit of spare blades is available.
It is composed by:

- nr. 3 blades with double sharp
- nr. 1 stainless steel screw
- nr. 1 service key

Certificate no. 900599
